

NATIONAL CLINICAL SERVICES

NCS Clinic

Founding Partner Prospectus

Your Clinic. Our Expertise. One National Vision.

A developing national network of private, pharmacist-led healthcare clinics.

EXPRESSION OF INTEREST DOCUMENT — SERVICES IN DEVELOPMENT

THE VISION

One National Vision for Private Healthcare

NCS Clinic is the next chapter of National Clinical Services — a developing UK-wide network of private, pharmacist-led healthcare clinics, bringing together independent prescribing, specialist clinical support and modern digital healthcare.

National Clinical Services is a UK-founded, multi-service organisation delivering clinical pharmacy services, healthcare workforce solutions, community pharmacy support, out-of-hours medication services and specialist passenger transport. NCS Clinic extends that experience into private healthcare.

Our ambition is to make private healthcare more accessible while creating new opportunities for pharmacy professionals — and to build one of the UK's leading pharmacist-led private clinic networks.

- **Pharmacist-led private healthcare, delivered with professional governance**
- **Community pharmacy partnerships that build on existing premises**
- **Planned clinical training, protocols and service frameworks**
- **A future integrated digital healthcare platform**

Status: NCS Clinic is currently a development project. Clinics, services, training programmes and the digital platform will launch only when the necessary professional, operational and regulatory arrangements are in place.

Transform Your Pharmacy Into a Private Healthcare Destination

Community pharmacies are ideally positioned to expand access to private healthcare. The proposed NCS Clinic partnership model is designed to help eligible pharmacies introduce additional clinical services using suitable existing consultation facilities, where possible — supported by an established central brand, planned clinical training, operational guidance and ongoing support.

- Make use of existing space — explore using an appropriate consultation room within your pharmacy
- Expand private clinical services appropriate to your premises, clinicians and regulatory arrangements
- Develop new revenue opportunities from private consultations and prescribing
- Operate under the consistent NCS Clinic identity through an agreed licensing or partnership model
- Access planned service-specific training, protocols and professional development
- Receive ongoing operational guidance — setup, clinical workflows, marketing and delivery

A model designed around your existing infrastructure. Initial premises investment may be relatively modest where appropriate consultation facilities already exist; actual setup costs depend on premises, equipment, staffing, governance, insurance, regulatory requirements and the selected services.

FOR INDEPENDENT PRESCRIBING PHARMACISTS

Build Something of Your Own

NCS Clinic is being designed to help eligible pharmacist independent prescribers explore establishing their own branded clinics — whether with their own premises or in collaboration with a community pharmacy.

- Use of the NCS Clinic brand, subject to an agreement
- Planned training and clinical service frameworks
- Support with clinic setup and service development
- Access to proposed GP and specialist pharmacist advisory pathways
- Marketing and patient acquisition support
- Future access to the NCS Clinic digital platform

THE PARTNERSHIP MODEL

Two Routes Into the Network

COMMUNITY PHARMACY PARTNER	INDEPENDENT PRESCRIBER PARTNER
Independent pharmacy owners, pharmacy groups and pharmacies with consultation rooms looking to expand private clinical services.	GPhC-registered pharmacist independent prescribers seeking to open a private clinic or partner with a suitable pharmacy.
Branding, training, approved clinical pathways, operational and marketing support, future online booking integration and participation in a wider clinic network.	Branded clinic model, setup and operational guidance, clinical training and support pathways, marketing resources and future digital platform integration.

PROPOSED SERVICES

A Comprehensive Range of Private Healthcare Services

Weight Management & Metabolic Health	medical weight management, GLP-1 assessment where appropriate, monitoring and lifestyle support
Men's Health	testosterone deficiency assessment, TRT subject to specialist pathways, sexual health, hair loss
Women's Health	menopause and perimenopause, HRT assessment, contraception, reproductive health
ADHD & Neurodevelopmental	screening, specialist-led assessment pathways, reviews and monitoring — only where appropriately authorised and specialist-led
Skin & Dermatology	acne, rosacea, eczema, psoriasis, hair and scalp concerns
Sexual Health	erectile dysfunction, contraception, STI screening and referral
Cardiovascular Health	hypertension, cholesterol, cardiovascular risk assessment
Diabetes & Metabolic Health	type 2 reviews, HbA1c pathways, prediabetes support
Digestive Health	reflux, IBS assessment, constipation, referral pathways
Travel Health	consultations, vaccinations, malaria prevention
General Private Healthcare	minor illness, private prescriptions, health screening, blood testing
Specialist — Future Development	GP-led clinics, sleep and respiratory health, mental health assessment and referral

Services are in development. Availability will vary by clinic, clinician qualifications, regulatory permissions and approved clinical pathways.

HOW TO JOIN

Your Journey to Becoming an NCS Clinic Partner

- 1. Register your interest — tell us whether you are a community pharmacy owner or an independent prescribing pharmacist
- 2. Initial discussion — we discuss your location, experience, facilities, ambitions and proposed services
- 3. Partnership assessment — suitability, clinical competencies, premises, regulatory considerations and the proposed commercial model
- 4. Training & clinic development — subject to programme launch and a signed agreement, complete preparation, training, governance and setup
- 5. Launch your clinic — following all necessary approvals, begin providing authorised NCS Clinic services with agreed support

CLINICAL SAFETY

Our Regulatory Position

Each service and location will require appropriate assessment of GPhC registration and scope of practice, CQC registration where applicable, clinical governance and safeguarding, prescribing protocols and accountability, medical indemnity, patient consent and confidentiality, UK GDPR and health information security, and specialist clinical oversight where required.

REGISTER YOUR INTEREST

Be Part of the First Generation of NCS Clinics

We are inviting expressions of interest from community pharmacy owners and qualified independent prescribing pharmacists. Registering interest creates no obligation on either side; no territories, fees, earnings or launch dates are promised at this stage.
